

# *A Partial List Of Conditions Linked With Oxidative Stress*

For information about a condition not listed here, visit [www.pubmed.gov](http://www.pubmed.gov) or do a general internet search for “*oxidative stress and YourCondition.*”

---

acne	congestive symptoms of	liver cirrhosis
age-related physical and mental deterioration (e.g., Alzheimer’s Disease and age- related dementia)	premenstrual syndrome	liver fibrosis
age-related vision loss	convalescence	lumbago
aging	cough	macular degeneration
AIDS	cuts	manic depression
alcoholic paranoia	dandruff	memory loss
alcoholism	dental caries	migraine headaches
allergies	depression	multiple sclerosis
altitude sickness	diabetes	muscle energy loss
anemia	diabetes due to cirrhosis	pain
angina pectoris	diarrhea	panic attacks
anklylosing spondylitis	diseases of the alimentary canal and respiratory system	paralysis
anxiety	elevated blood glucose	Parkinson’s disease
anxiety disorders	emaciation	periodontitis
arteriosclerosis and atherosclerosis)	epilepsy	peripheral vascular disease
arthritis (e.g., psoriatic arthritis; anklylosing spondylitis; and rheumatoid arthritis)	equilibrium disorder	piles
asthma	fatigue	pneumonia
attention deficit disorder	fever	poison ivy
bacterial infection	gastritis	pseudoporphyria
breathing difficulties	glaucoma	psoriasis
bronchoulmonary disease as cystic fibrosis	graft rejection	Raynaud’s disease
burns	halitosis	rheumatism
bursitis	headache	schizophrenia
cancer (e.g.; prostate cancer, lung cancer and breast cancer)	heart attack	skin inflammations and disorders
canker sores	heart disease	sore gums
carbuncles	hemorrhoids	sore throat
cardiovascular disease (e.g., hypertension; thrombosis; arteriosclerosis)	hepatitis	sores
cerebral vascular insufficiency and impaired cerebral performance	herpes	stomach ulcers
chronic bronchitis	high blood pressure	stress
chronic hepatitis	high cholesterol	sunburn
chronic obstructive pulmonary disease	HIV	swollen glands
congestive heart failure	immune disorders	syphilis
	immune disorders that induce toxic shock	thrombosis
	immune system problems	tinnitus (ringing in the ear)
	indigestion	tissue inflammation
	infertility	toxin-induced hepatotoxicity, inflammation
	inflammation	tuberculosis
	insect bites	ulcers
	insomnia	Unverricht-Lundborg disease
	intermittent claudication	venous insufficiency (pooling of blood in the veins; usually in the legs)
	ischemia/reperfusion injury	vertigo
	jaundice	viral infection
	kidney damage during coronary angiography	wrinkles
	leprosy
